Math 5 — Course Syllabus

Mary, Star of the Sea School · SY 2026-2027

Course Description

Math 5 is the bridge from elementary arithmetic to middle school math

thinking. Using the **enVisionMATH 2.0** program, students master decimal

place value, fluently compute with whole numbers and decimals, deepen

fraction understanding through addition, subtraction, multiplication, and

division, and explore volume, coordinate geometry, patterns, and 2-D figures.

Each topic is scaffolded with visual models, hands-on activities, small-group

problem solving, focused practice, and math games. By year-end, students

are ready for the abstract reasoning of Math 6 and for real-world quantitative

thinking.

Textbook: enVisionMATH 2.0 · Common Core Grade 5 (Savvas / Pearson)

Teacher

Ms. Alyssa Soto-Gelacio

✉ asoto-gelacio@starofthesea.org

Parents may email me or leave a message with the school. I respond within

24 hours.

Materials

- Composition notebook (math journal)
- Pencils, erasers, highlighters
- Loose-leaf notebook paper
- Calculator (basic four-function)
- Folder for handouts and take-home practice
- Textbook (enVisionMATH 2.0 Grade 5)

Grading Policy

20% Participation Journals, notes, in-class behavior, materials ready

25% Tests 1 per topic; short-answer + problem solving

30%HomeworkNightly practice, classwork, class prep, projects

25%Quizzes2 per topic, short (5-10 pts each)

Make-ups: Students who score below 80% on a topic test may complete

corrections or retake to improve their grade.

Late work: Homework is due the next class meeting. Late work earns a

maximum of 50% credit; if not turned in after two class meetings, the grade is

a zero.

Course Outline by Quarter — Math 5 (enVisionMATH 2.0)

| Q1 — Place Value & Whole-Number / Decimal Operations

- **Topic 1:** Understand Place Value (through thousandths)
- **Topic 2:** Add and Subtract Decimals to Hundredths
- **Topic 3:** Fluently Multiply Multi-Digit Whole Numbers
- **Topic 4:** Use Models and Strategies to Multiply Decimals

| Q2 — Division & Fractions with Common Denominators

- **Topic 5:** Use Models and Strategies to Divide Whole Numbers
- **Topic 6:** Use Models and Strategies to Divide Decimals
- **Topic 7:** Use Equivalent Fractions to Add and Subtract Fractions

| Q3 — Fractions, Data & Volume

- **Topic 8:** Apply Understanding of Multiplication to Multiply Fractions
- **Topic 9:** Apply Understanding of Division to Divide Fractions

- **Topic 10:** Represent and Interpret Data (line plots, bar/line graphs)
- **Topic 11:** Understand Volume Concepts (rectangular prisms)

Q4 — Measurement, Expressions, Coordinate Plane & Geometry

- **Topic 12:** Convert Measurements (customary and metric)
- **Topic 13:** Write and Interpret Numerical Expressions
- **Topic 14:** Graph Points on the Coordinate Plane
- **Topic 15:** Algebra — Analyze Patterns and Relationships
- **Topic 16:** Geometric Measurement — Classify Two-Dimensional Figures

Student & Parent Communication

Beehively is the platform where students and parents can regularly check

grade progress and receive notifications of missing or incomplete

assignments.

Parents are contacted by email up to 2 times if their child is receiving a

deficiency, plus standard email notifications. Students are always informed of

any grade that is a C or lower and ultimately are responsible for their grades.

Student work is updated regularly.

Math 5 Goals

In 5th grade, our goal is to build the numeric fluency, conceptual

understanding, and problem-solving mindset students will carry into middle

school. We focus on *place-value depth* (into thousandths), *fluent decimal*

computation, *fraction operations with meaning* (not just tricks), *volume as a*

measure, and *the first taste of algebraic patterns and coordinate reasoning*.

Every topic combines hands-on models, real-world contexts, and reflection so

students don't just *get the answer* — they can explain *why the math works*.

By June, 5th graders leave prepared for the abstract thinking of Math 6, and

confident in their voice as young mathematicians.
